- Strong problem-solving skills
- Excellent analytical skills
- Ability to manage multiple tasks simultaneously
- Ability to work under pressure and meet deadlines

SKILLS

Programming Languages   7

- TypeScript
- JavaScript
- Python
- Java
- C++

Frontend   7

- React
- Angular
- Electron
- HTML/CSS

Backend   7

- NodeJS / Express
- tRPC
- Flask

CI / CD   6

- Docker
- Github Actions
- AWS

Computer Science   7

- Structures de données
- Algorithmes

PROFESSIONAL EXPERIENCE

March 2023 - Present

Senior Software Developer

Zendesk

Promoted to Senior Software Developer in less than 10 months for outstanding performance and contributions to the team.

April 2022 - March 2023

Software Developer

Zendesk

Software Developer in a messaging incubation team: development of innovative solutions and prototypes.

- Actively developing messaging projects using nodejs and react (typescript) to enhance user communication and collaboration.
- Created a Chrome extension for interactive presentation of prototypes on any website, eliminating the need for test environments.
- Demonstrated strong teamwork skills, provided mentorship to junior developers, and fostered a collaborative work environment.

September 2020 - April 2022

Software Developer

SG Digital

As a full stack game developer, my role was to help create and launch games using a 2D game engine in Typescript for the frontend and a Java-powered backend.

- Promoted from a frontend-only role to a full stack role after only a few months.
- Completed 3 games within a year with my team, 1 more than the usual average.
- Started development of an internal tool that significantly reduced the time needed for creating components for the game.

Summer - 2019

Software Development Intern

PreVu3D

As a software developer intern at a startup, my role was to assist in creating the main interface of the application, a RESTful API for the backend, deploy the application to the cloud, and manage the application's database.

- Created a CI/CD pipeline for the application.
- Helped launch the initial version of the application.

Summer - 2018

Intern in Software Development and Testing

Ultra Electronics Forensic Technology Inc

As a software development intern, I was assigned to various projects. The first project involved designing and implementing an infrastructure for automatic testing of computer vision algorithms. The second project involved assisting in creating a web application used for communication with a passport reader.

- Successfully completed the project assigned to me for the entire internship (4 months) in just two months.

Summer - 2017

Intern in Quality Assurance

XMedius

As a software testing intern, I was tasked with repairing and maintaining a test bot to perform end-to-end testing of the web application. I was also responsible for implementing automated integration tests for the web application. Finally, I also implemented various routine scripts.

💼 EDUCATION

2016 - 2020

Bachelor's degree in Software Engineering

Polytechnique Montréal
